About This Game

Summary

rFactor is a realistic easily extendable racing simulation from Image Space Incorporated. It offers the latest in vehicle and race customization, great graphics, outstanding multiplayer, and the height of racing realism. rFactor features mixed class road racing with ultra realistic dynamics, an immersive sound environment and stunning graphics.

You can race against a field of AI cars, or in multi-player mode against others. The simulation supports a full day-night cycle. In multi-player mode, driver swaps are also supported, allowing you to run even full 24 hour endurance events. Everything can be customized by the community, including adding new tracks and cars, and a wealth of add-ons are available on-line.

Features

Physics

- Updated 15 degrees of freedom physics engine
- Advanced tire modeling
- Support for 4-link rear suspension

-
- Engine boost modeling
 - Complex aerodynamics
 - Head physics, cockpit vibrations, detailed bump modeling
 - All-new track-specific terrain data file system

Graphics/Sound

- DX9 advanced graphics engine
- Real-time day/night transitions
- Projected headlights for nighttime driving
- Adjust player and opponent volume ratio
- See the apex with the Look Ahead slider
- Adjust your seat and mirror while in the driver's seat
- Updating real-time scoring towers
- Expanded and enhanced gauge and LCD features for vehicle cockpits
- Improved loading times
- Updated sound engine
- Changing engine sounds based on upgraded vehicle performance

Gameplay

- Career mode with upgrades that affect the vehicle's appearance, performance, and sound
- Define AI opponent types, strength and aggression
- Races can be lap based, time based or both
- Vehicle upgrade system
- Vehicle economy including mileage
- Ambient and track temperature changes throughout the race
- More configurable keys than you can shake a stick at
- Multiple Racing Series with vehicle and circuit filters
- Grid editing

Camera/Replays

-
- Full screen monitor and ability to rewind
 - Freely move camera from any position including the ever famous exclusive ISI Swingman
 - Spectator mode
 - Greatly enhanced replay system including clip splicing
 - Move, duplicate or delete replay clips while assigning camera movements to each
 - Export replays to AVI files defining compression and size options

Multiplayer

- Completely new multiplayer engine
- Built in race statistics reporting to web based RaceCast system
- Built in friends list
- Server bookmarks
- Dedicated server, including single click option
- Native voting system
- Add AI to multiplayer games
- Built in IRC chat
- Boot and ban player lists that can be passed around
- Security checks to combat potential cheating

Open Architecture

- Extensive support for modders
- Easy to use customizable multi-language support
- Define a league schedule
- Rules to simulate different types of racing
- Completely customize your controller
- Drop in new vehicle liveries

Vehicles

-
- 2006 Formula IS – High Performance Open Wheel (Video)
 - 2005 Hammer – Full Bodied GT
 - 2005 Howston – Full Bodied GT
 - National Stock Car – Stock Car
 - Panoz – Full Bodied GT
 - 2005 Rayzor – Rally Turbo
 - 2006 rF3 – Quick and Nimble Open Wheel
 - 2005 Rhez – Small FWD Sport Compact
 - 2006 Rhez – Small FWD Sport Compact
 - 2005 rTrainer – Low Speed Open Wheel
 - 2005 Venom – Rally
 - 2005 ZR – Affordable High Performance Sedan

Circuits

- Barcelona – Permanent Road Course
- Brianza – Permanent Road Course
- Essington Park – Permanent Road Course
- Jacksonville Speedway – High Banked Superspeedway
- Jiading – Permanent Road Course
- Joesville Speedway – Paved Short Track
- Lienz Festival – Country Roads (Video)
- Mills Metropark – Permanent Road Course with two layouts
- Montreal – Permanent Road Course
- Northamptonshire – Permanent Road Course
- Nuerburg – Permanent Road Course
- Orchard Lake – Banked Tri-Oval with Infield Road Course
- Sardian Heights – Street Circuit with two layouts
- Toban Raceway Park – Permanent Road Course with four layouts

Title: rFactor
Genre: Racing, Simulation, Sports
Developer:
Image Space Incorporated
Publisher:
Image Space Incorporated
Release Date: 31 Aug, 2005

a09c17d780

Minimum:

OS: PC Windows 98 SE, ME, 2000, XP, XP 64-bit, Vista, 7, 8

Processor: 1.4 GHz processor

Memory: 1 GB RAM

Graphics: Geforce4 4200 or Radeon 9200

DirectX: Version 9.0c

Network: Broadband Internet connection

Storage: 2 GB available space

English,French,Italian,German,Czech

To put simply, I love rFactor, it is a game I will always love. If you haven't bought it buy it, you will love it.. Still one of the best racing simulation games with a giant modding community!

Amazing physics, superb racing-wheel support, awesome sounds, lots of fun!. It is a good game.. Even after 10 years of being released rFactor is still one of the best sim racers one can get.

Gameplay is excellent, handling of the cars is consistent and intuitive, good controller support, and the huge amount of mods make up for the small amount of base content.

Graphics are dated when compared to current games but they're very good considering the game's age, especially if you configure them properly in Nvidia CP/Inspector. Engine sounds are also very good.

Controller support for Xbox360 controller is pretty good, I only had to adjust steering deadzone, one can fully customize the controls, some cars are more difficult to drive than others but overall controls feel intuitive and consistent.

Gameplay is great, there's all sorts of options for setting up practice sessions as well as for setting up races against AI, AI can be very fun to race against once you figure out the proper difficulty settings.

The base content is OK at best, only the open-wheelers and some of the tracks were interesting to me, ISI versions of tracks such as Silverstone, Nurburgring & Catalunya aren't very accurate imo. However mods more than make up for that. There's tons of mods available, pretty much every car discipline there is can be found in mod websites, as well as hundreds of real & fictional track locations. There are also mods for UI, hud, showroom, and so forth, meaning one can totally customize the game to their preferences.

The huge amount of mods combined with the excellent gameplay makes rFactor a must have for anyone interested in sim racing. rFactor is fairly light on system requirements so it can be played on highest settings even on old PCs & laptops. I highly recommend getting this game.. As a sim racing enthusiast I can be very critical of racing games or "sims". rFactor is near and dear to my heart. When I discovered this gem back in 2009 and all of the mods, tracks, etc. that you can use with it, there is no game or "sim" that brings the value like rFactor. Sure rFactor 2 has been released now, but if you are feeling nostalgic or don't have the computer to run rFactor 2, then this original is well worth the investment. You won't be disappointed, I guarantee it!. Nice rFactor to Steam! A lot of mods Cars and Tracks, Awesome sim racing :). It's an old game but still one of the best and most realistic racing sims out there.. By far the best sim out there IMO (until more mods come out for rFactor2). I have only clocked 25 hours on this game as of today and I am sure I will clock over 1000 due to the many season/custom career mode possibilities. Buy this game if you are looking for a new game to main.

This feels cobbled together. It feels more like an ugly hack than a complete game. I recommend GT Legends which uses the same engine but is MUCH more polished and complete.. Fun but rage producer sometimes depending on how seriously u take it. pretty decent. Still a great game. Downloaded shift street mod with plenty of real world cars. got an old second pc hooked up my old steering wheel ---> endless multiplayer fun! Graphics are still good enough too.. good physics and it is a ton of fun to play this with a steering wheel :D graphics are ok (for 2005). Picked this up for a trip down memory lane after the disappointment of Assetto Corsa and Project Cars and man am i glad i did. It may not be the prettiest but looks aren't everything. Physics/handling and ai if not racing online are what matters and this game despite its age still delivers. It literally has something for everyone with the abundance of mods the awesome modding community have made over the years. Be it hill climbing, a trip down memory lane with some older cars, oval racing (stock cars and open wheel), up to endurance and formula one. Can also just have some fun, for example ever wondered what it would be like to a mini around Indianapolis or a stock car around Silverstone, go for it, its surprisingly fun and the ai can given you a half decent race as well. There are newer and a couple of better games out there (Automobilista springs to mind) but if you are looking at this game and reading this clown blabbering on then you have some idea of sim racing as opposed to playing a racing game (that's not a knock btw, both have their place and are equally awesome) this is well worth a try, maybe not at full price but definitely for a tenner or less. The only problem i have is there are so many mods out there that back when it first came out, before this steam business you could have several 'lite' installs on your hard drive and place various mods into the different installs (remember having CART factor, HistoricX and Enduracers on 3 separate installs as well as the standard game with the Megane trophy. It's a bit more of a pain in the neck doing that on here. Apart from that, if graphics are not the be all and end all and gameplay is what interests you then give it a try.. Trash race sim. No idea why this was one of the most recommended racing sims.
